	This google sheet is created by Dr Mostafa Saad Ibrahii	n. Overall ~950 problems for newcomers to problem solving.	
Problem Solving Sheet	mostafa.saad.fci@gmail.com <u>Ask.fm</u>	Site / More Contacts	
Troblem colving cheet	Video Introducing roadmap (Arabic) - to min 18 ONLY	Video explaining the sheet	
	Currenet Version V7.0	<u>Latest Version</u>	
What is this Sheet?	 Covering most of topics needed up to codeforces Div2-I Problems of scales 1 - 5.5 / 10 + Few harder ones Problems increase in difficulty per topic with intermediat Speed problems to maintain speed goals A lot of recorded videos for problems solutions, especia Several students followed its order and managed to solve a video of the following ways: A) Blind-Order training style Problems are distributed in sheets CF-A, CF-B, CF-C1, This one is a roadmap. It targets learning the knowledge Every sheet page is on average harder than the previou. This is my recommended way, though most camps/trainless is my recommended way, though most camps/trainless Quality column: P5 (important), P4(very interest Say your level is 6/10, and solved a problem of level 3 vounced to be careful with such style as it may corrupt Advantage: Mastering the algorithm tell solving some ha Disadvantage: Discovering the algorithm behind the pro 	as Faq, Topics, CF-C2 level from other OJs), but from easy to hard). Same for CF-D1, D2, D e easy/medium problems + ad-hoc problems lly for the entry levels (Arabic) re by themselves 95% of it (up to his current sheet page) CF-D3 e/skills in a consistent and balanced way s sheet page ning-approaches don't use this style ms (CF-A to CF-D3) ordered by category and level, around 950 problemg), P3(interesting), P2(good), P1(ok), Empty (normal) vith P5, you will find it a normal one. So notice, it is subjective to your siguide to skip some problems vay. your training quality, e.g. due to your bias rd problems in a short time blem is an important skill. Given that you know the topic, you lose a gets you solve many of it easier. However, when solving in real contests	ems level/background ood space to improve this skill
	- See Topics2 page (for extra topics/problems in specific	cases)	
	Proceedings of the process of the pr	,	
Advantages of this Sheet?	To be a strong contestant, one has to take care of a nur ==> This roadmap does its best to satisfy that Typical issues in our Arabian region: Guys with 700-100 Why? A) No specific roadmap or keep switching between the B) Training while knowing problem category / level C) Focus on specific online judge Again, this sheet solves these issues Allows you to write down your statiscs to learn from ther Continuous refining based on feedback	i0 solved problems and still weak!	
Your Sheet COPY	- Don't download the sheet, Use it online - Can't edit it? Because it is read-only. Read below notes - Just make a copy to your google driver - Then work over it online. Following are the details - Login to ur google Gmail - Go to my sheet - In the sheet click on 'file' menu - select Make copy - it will create copy for u - RENAME it to Junior Sheet <your name=""> - Now the copied sheet is opened for you (or go inside ur</your>		ns to learn
For Whom?	A junior is anyone who does't master solving codeforces		
Prerequisites?	Basic Programming skills such in series C++ Programm If you find my sheet is hard, Finish Assiut University prov. Know about our community and what is programming cord code with any language but preferred C++ or Java. For J	https://wides an easier starting roadmap. Finish it first Novice RoadMap	C++ is highly recommended Online Judge
	Entany language and protein out of the control of the	Social Mary Origin	
Training Style?	You can train alone, but highly advised to find partner(s)	o work with to encourage each other.	
Skills Goals	Moving from Junior Level to Semi-Senior Level: A one wh	no do pretty well in CF-Div2 A, B, C, D and similar levels (e.g. TC-Div2	2-1000)
Knowledge Goals		in Number Theory, Dynamic Programming, Greedy, Graph Theory an	,
Sheets	Sheet pages are mainly for Codeforces Div2 A, B, C, D + Each sheet has some sets, each set is ~10-15 problems. If you did well in the mandatory sets, move to next sheet. Please watch the videos in order, solve UVA/SPOJ problems to some columns, some time recordings. This helps you to the solution of the columns of the solution of the columns.	Problems on knolwdge topics (Mainly from UVA, SPOJ)The top sets are mandatoryThe below sets (after line mark) are ootherwise you still need training on similar levelthen solve the optic ems in order. Don't skip them. o know how much time you take per a problemuse that to recognize from 1-2 (easy), 3-4 (medium), 5-6(hard), 7-8 (had to read editorials), ms.	ptional pnal problems gour problems 9-10 (can't solve)
	If you solved a problem before, put ACX instead of AC. D		

	Don't let a problem	consumes more tha	n 2-3 hours. If can't so	ve it. see editorials/so	olutions. If still can't s	solve it. just leave it for	now.			
			ple vary in their progre			, ,				
			, , ,							
	Use the following gu	lide to assign a prop	per problem level							
Problem Level Column	Div2-A => 1 - 2 Div2-B => 1.5 - 3 Div2-C => 3 - 5.5 Div2-D => 5 - 6.5 Div2-E => 6 - 7.5 Div1-D => 7 - 8.5 Div1-E => 8 - 9.75	3 7 7								
		t of the time, one sh	ouldn't assign Div2-A լ	problem level such as	5. But it can be: 1, 1	1.5, 2. Very few might	be 2.5			
Notations	CF136-D2-A	CF (codeforces), E	02 (Division 2), (136, A) is the problem URL.	Note this is not Rou	nd 136 it is Round 9	97			
Notations	SRM150-D2-1000	SRM 150 (Topcod	er), D2 (Division 2), 10	00 (3rd problem)						
	For Topcoder:									
	However, if using th	e web arena, you ne	ally use SRM number (eed first the problem no from the editorial if ex	ame itself! (the new w	ay - https://arena.top	ocoder.com/)

	V1: initial release									
		Sheet P2A: Little n	roblems replaced + red	ordering, P2B, P2C, F	22D merged in P2R	P3A and P3B: new kn	owledge sheets			
			plit over 3 sheets, reor							
		ogle.com/spreadshe ledge concerns:	ets/d/12YI86X40xGtid							
	2- Adding Easy problems after each video. You don't have to search by yourself anymore 3- Distributing many of the knowledge problems inside the the main sheets instead of delaying them to the last sheets. Other concerns: 4- More smooth transitions from a sheet to another									
	5- Utilizing the new		ed by CF since initial s	heet creation						
	V5	tions to same suit ti	ag problems							
	 Added Video Solu Added Easier DP Added new topics: Polygons 	problems after its Int	ro videos	ks, games, probability), Max Flow, SCC, S	Segment Tree, 2 points	ers, Trie, KMP, Geometry			
	- Added problems for		palance the available p ne old Misc sheet prob		egory.					
History	- Then Remove Mis	c sheet	n the major change for		c" sheet with the 3 E	Div2-D sheets. If wanna	a migrate:			
	- Click on the arrow	IOI DIVZ-D sneets, a	and make copy for you	Sneet						

- Added 3 columns to the sheet: debug time, category and by yourself columns
 Each sheet is enhanced with problems from the lower sheet (shifted from it). The purpose is to mix levels per sheet, hence allow multiple training levels in same time (hard vs speed concern). See the new added color

- Added probability/expectations English videos/problems
 Added Topological sort problems
 Solution editorials linked to many non-CF problems / more videos in DIv2-A/Div2-B
- Add many problems where my trainees marked as interesting problems. Removed some problems that I think not that interesting or its ideas covered by other problems (subjective). I am working on sheets with a simple, but hard to do idea: Most of the problems seems for the trainer novel in idea with less repeated ideas, hence learning a lot while solving much less.
- Add topics based training style sheet page

- Added Topics2 (See notes there) - not intended for juniors

If you are working in some sheet, find the convenient point to switch. E.g. if you are in middle of sheet, finish it and move to new sheet page from next one. Say you are in middle C1. Finish it first. Then remove C2, D1, D2, D3. In the new version, click a sheet page and select Copy To, then copy to your sheet. In other words, migration should be 5-min process. If need more, you are doing it wrongly.

Thanks for all guys who sent sheet feedback: Mariam Alshereef, Magdy Hassan, Ahmed Yasser, Ahmed Elsayed Awad, Mohamed Nasser, Mostafa Ali Mansour, Aya elymany, Ayyad shenouda, Others

Special Thanks for Coach Alhussain Aly for his continuous help

Special Thanks for All volunteers in videos recording / Editorials writing

Q) What is the sheet requirements? Should I study algorithms and Data structures?

- ONLY programming skills (e.g. Programming 1 level). It is highly advised to implement 2-3 projects
- NO for datastructures, but learn STL (or Collections in Java/C#), It helps alot
- NO for algorithms, the sheet will teach you that in a smooth way
- For C++ guys (and others as guide) first 18 videos here: https://www.youtube.com/playlist?list=PLPt2dINI2MIZPFq6HyUB1Uhxdh1UDnZMS

Q) How much time do I need to finish the sheet?

- Answer varies from one to another
- Some trainees are fast through whole sheet
- Some trainees are slow through whole sheet Some trainees are fast in early pages, but slow at the end
- Some trainees are slow in early pages, but fast at the end
- The sheet has ~900 problems. Around 60 videos. Problems targets average guys. However, you are ecnouraged to skip problems whenever you could. I expect many guys could skip 20%-30% of the mandatory problems. Make use of the Topics page.

215 problems of level <= 2.5 (avg 20 min per problem)

23 problems of level <= 3.5 (avg 30 min per problem)
270 problems of level <= 4.5 (avg 40 min per problem)
178 problems of level <= 4.5 (avg 40 min per problem)
179 problems of level <= 5.25 (avg 60 min per problem)
179 problems of level <= 5.75 (avg 75 min per problem) 53 problems of level > 5.75 (avg 90 min per problem)

215*20+93*30+270*40+178*60+127*75+53*90 = ~700 hours (say max 900 hours)

If you trained in the summer vacation seriously for 2 month (e.g. 10 hours * 30 days * 2 month = 600 hours) + the reamining of the year effort, you could solve the whole sheet smoothly and move to Div2-

- https://ask.fm/mostafasaad87/answers/144907000290 [adjust to whatever fits with you]

Q) When should I give up and check the editorials and solutions?

https://ask.fm/mostafasaad87/answers/144907000290

Q) Got WA, should I check directly the test cases?

- No, remember in a real contest you only know your problem status (WA, TLE, ...etc)
- Struggle to find the wrong case by yourself. At least 15-30 minutes.
 Don't keep trying longer, just check the test cases
- If you can write a brute force solution for your problem, write a stress test: Generate random cases and compare the optimal algorithm with the brute force case

Q) What is the debug time?

- Once you finish coding and start testing, you verify if the program is working as expected or not

 If not, there are bugs that you need to find to make the program behave as expected. From this moment till getting the program AC = debugging time

 People could debug using 'print statements'. A better way using a debugger

 Check out these 4 videos: https://www.youtube.com/watch?v=DlbQwQEiDW0&t=0s&index=35&list=PLPt2dINI2MIZPFq6HyUB1Uhxdh1UDnZMS

Q) Should I solve every problem?

- Generally, preferred, but If you think certain level is easy (e.g. solve it within 15 minutes), then jump a block and so on
- This jumping might be for codeforces problems only

Q) Just started in Div2-A, could I finish its codeforces problems first, then solve the UVA/Colored problems?

- Many juniors find UVA problems in Div2-A hard. Lunderstand
- Yes, almost same for DIv2-B. But don't do that in next sheets as order might matter, because all of such knowledge are mainly preparations for hard Div2-B or Div2-B.
- However, following the order is a much better idea
- Similarly, one could finish All Div2-A/Div2-B codeforces problems, then solve their colored problems. Again, this is not the best way.

Q) Is using C# ok?

- Generally yes, but you won't be able to submit in UVA judge, as C# is not supported
 For such problems, write your code, but heavily test it. You may download an internet code and evalaute the test case on both
 On the other hand, learning Basic C++ + STL is not hard for C#/Java guys
- C++/Java/Pvthon are official in UVA
- Codeforces allows more such as Javascript

Q) When I watch a video, should I solve the problems in its info section?

- No. sheet has subset of these problems already in specific order
- Sheet is self-contained

Q) I watched the video, but it is hard, any tips?

- Algorithms are hard, learn to struggle
- Watch the video 2-3 times, try to rewrite its code by yourself
 Still can't get it? Google for more materials from the web (ppt/pdf/videos) and try to learn
- In worst case, leave it for now and return to it later
- Q) How does your sheet prepare for ECPC/ACPC?

- The sheet prepares you to reach level 5-5.5/10 in several categories
- If a team of 3 members solved the whole sheet, they may rank in the top 15 in the contest

But let's go in details. Individual sucess in contests depends on several factors. Let me state some of them.

- Solving many problems of good quality

- Improving your different skills (reading, thinking, coding and accuracy).
 2 persons could solve in training the same problem. One got it in 20 min first submission, and the 2nd needed 90 minutes due to 60 minutes debugging.
 Healthy training: Regular / good times for training (e.g. morning) / weekly contests / reading other codes / collaboration with others / etc
- Stress management during contests
- Emotions management when fail in solving or feel performance is not improving enough
- Avoiding Psychological issues: Comparing to others, Negative feelings, Your image, Regretting trainging time

- Moving toward a team contest, you need more concerns:
 Serious team members. If only one active member, they may end up in bad performance. So EACH team member need to finish the sheet individually + weekly contests
 Tolerating team mistakes during the contest
- PC management
- Suitable strategy + several team contests to tune it

As you may notice, there are MANY factors for sucess.

- This sheet provides you with high quality problems and good topics distribution + way to record your stats to know your weak points However, there are many concerns that YOU have to tackle by yourself and your team members
- Finish up to CF-C2 sheet, then study from the "Cracking the Coding Interview: 150 Programming Questions and Solutions" book Also watch: https://www.youtube.com/watch?v=39vqarATPyM

Q) How different is your sheet versus Ahmed Aly Ladders?

- Ladder problems are selected automatically, no personal investigation for the actual benefit/need from the problem
- Mine is mixed between automated and manual.
- At the current moments, many of my trainees and students feedback, I am aware of the problem level and its category.
 I updated the sheet many times because of the received feedback

- My sheet involves the algorithms videos to learn, in order, while you grow up.
 I selected videos to prepare you as soon as possible for Div2-C/Div2-D where many algorithms starts to appear
- It is a sheet. ready for you to record your times, notes...etc...this help to improve yourself
 It is not blocking style. If you can't solve problem, just leave it and move to other one. In ladders, you see next problem when solve current one (or do workarounds)

Q) How did you **select problems** for the sheet?

- Long story, many versions were there, from a version to another improvements were applied
- Codeforces problems where rated based on this CF tool: http://codeforces.com/blog/entry/46304?mobile=true#_=_
 Any rating is just an estimation. I found this one a pretty reasonable measure
 The videos are selected such that when comes to Div2-C/, you are ready
 Manual selections and investigations for non-CF problems to be used in the sheet

- Lots of manual efforts and investigations and feedback processing

Q) what is the next step after finishing your sheet?

- Joining directly my ICPC semi-seniors supervision, BUT
- Email me with your online sheet copy link and it **must** have Each row should have: code link, time details, problem level, category and comment per a problem
- I will review and decide
- Side note: If you started in Div2-C1 and solved first 15 problems, you can share the sheet with me to follow your updates

Q) can't access the sheet in edit mode?

- Don't download the sheet, Work over it online "better"
 Can't edit it? Because it is read-only. Read below notes.
- Just make a copy to your google driver
 Then work over it online. Following are the details
- Login to ur google Gmail
- Go to my sheet In the sheet click on 'file' menu
- select Make copy it will create copy for u

- RENAME it to Junior Training Sheet
 Now the copied sheet is opened for you (or go inside ur Google drive and you will find it)

NOTE: If u did so and still read-only format, then you are again opening my sheet (e.g. with old name), NOT your copy

Q) What to write in the category column?

The algorithm used to solve a problem. In Div2-A, this might be:

- This column is for the algorithm you used during solving. Usually, new guys in CF-A are confused. If so, leave it CF-A and start to write in CF-B The more you go in the sheet you will learn algorithms (e.g. Binary search, DP, DFS, etc). Then this what you write in level column The problem that has no algorithm but a specific idea called ad-hoc, This is the case for most of CF-A and less later

- Implementation: Means the problem request is almost direct, just code it
 Brute Force: Means instead of finding elegant solution, try all possible solutions (e.g. 3 nested loops) and select the solution
- Ad-hoc: Just per-problem thinking in a special way/analysis on how to solve the problem
 Please watch from this minute: https://youtu.be/DZ6YTtlLCE8?t=839

Q) Are problems really sorted based on easiness? I don't feel so.

They are sorted by easiness already. But, whatever order, anyone will find some are easy and some are hard in some order.

That is, no one can give you a list that every problem for YOU is easier than the next problem

In other words, If we gave 100 problems to 10 students of same level to solve and told them rank from easy to hard, they will rank them differently,

So, questions ordered by people average. The promise is, the problems will be within your range to solve

Q) What are these problems colors?

See "Problems Colors" notes in info page

Q) Are the problems sorted?

Yes, but this is tricky as sorting is subjective.
That is imagine 10 prblems given for 100 people to order based on its level, people will arrange in different ways based on theie experience

So if you felt they are not sorted, just keep going

Q) Why problem-solving is that important?

See the first 2 videos here: https://www.youtube.com/playlist?list=PLPt2dINI2MIaNcU070HIAO8JWYBcafuyG

Q) I feel bored when solving problems compare to doing projects?

https://ask.fm/mostafasaad87/answers/145333554402

Q) I would like to **freeze** my study for 1-2 years to be good in problem-solving?

I never liked that. Graduate on time. In your free times and vacations do more problem solving Relevant: https://ask.fm/mostafasaad87/answers/145151822818

Q) Topics based-training vs Blind Order

In topics training, we study a topic, then solve a lot of problems over it.

Advantages:
- Mastering the algorithm till solving some hard problems in short time

Disadvantages:

- Discovering the algorithm behind the problem is an important skill. Given that you know the topic, you lose a good space to improve this skill
- Being in the mode of specific algorithm lets you solve many of it easier. However, when solving in real contests, your mind is not so active on specific topic

In my sheets - Blind style:
- You solve 3-5 per topic. Then you have to discover the other problems by yourself. So you train to avoid the missing 2 points

- Although topics training let guys be so good early, they level stuck early and they don't improve. Seems to me, topics training is an important factor in doing so. Meanwhile, if you just target to be good in Div2D level in shorter time and no interest in further competitions achievments, you may go topics based.

Q) Who Flnished my sheet? Their levels?

https://ask.fm/mostafasaad87/answers/150802497762

Q) How to share my sheet progress with you?

https://ask.fm/mostafasaad87/answers/148552940002

Q) What is after the sheet?

- There are 2 other levels, each has around 1000 problems. Semi-senior level and seniors level
 Generally speaking, the region stars will solve a lot of problems, e.g. 2000-3000 problems with many of them of hard level
 Whoever finish the sheet, I join him in my supervision for the next levels

Problem Name	Problem Code	Status			Thinking Time(m)	Coding Time(m)	Debug Time(m)	Total Time(m)	Problem Level /10	By yourself?	Category	1-2 line Comments About your approach
	AC Averages =>	3	2.3	5	13	15	18	50	2	2	2	2
												Solution in mind is O(n*2): for each pair of points, get the equation of the straight line linking between them, and add 2 to its count. Print the count of the line having the max count. Problem is how to hash a line equation (coefficients are double).
Sample Name1	Sample Link1	AC	5	4	8	6	32	50	2	Yes	Math	My Performance Notes: This is so bad performance. Needed many submissions per problem. Always submit as if you are in real contest. Submit to AC, not to see if we will pass or not. Target AC from 1st submission. Think more before submission.
												I had to check the editorial
Sample Name2	Sample Link2	AC	1	5	10	35	20	70	2	No	Impl	My Performance Notes: This is so bad performance. He thought for little time and continued thinking while coding. As a result, much debug time too. RULE: Think More, Code Faster
												Please always write and study your timings.
Sample Name3	Sample Link3	AC	1	5	20	4	1	30	2	Yes	Graph	My Performance Notes: This is so good performance. 1st submission. Thinking is the higher. Code/Debug is so low. By time, thinking column will be improved.
Sample Name4	Sample Link4	WA	5	4	25	20	2	51	7	Hint	Math	Other Status values: AC, WA, CS, TLE, MLE, RTE, These values and comments are just examples. Just remove/ignore them.
Sample Name5	Sample Link5	CS	6	5	30	25	31	91 0	9			Want c++ solution for UVA 408? Google with: UVA 408 filetype:cpp

	Weekly Check List
	Training Secrets of Success Video
Reading	
ceaulig	Read within 3-5 minutes for short text problem. If no, you need to work on your Reading English Skills
	Never suspect later your problem understanding? If happens, you need to improve your comprehension / cases tracing
hinking	
	Ready and in the challenging mood before start solving.
	Striving against the problem for a reasonable time. If no, you need to change your solving spirit. Be a fighter.
	Found a solution; Do verifications: text cases / extra cases / correctness / time & memory
Coding	
Journa	Sketch in your mind the big picture of the code first. Don't rush for coding
	Code within 10 minutes. If more, you have coding skills problem or your understanding for the approach is not complete
	A lot of copy paste? Something wrong. Need a better code organization
	Needed more than 10 minutes to code medium size codes? Why? Identify the issue and solve it
Debugging	
	Which will be faster to catch the mistake? Printing or Debugger
	Don't know how to use a debugger? Learn this skill
	Needed more than 10 minutes to solve bugs? Something is wrong. Why need all this time? How to solve this issue?
Code is ready!	
	Just submit and see if passed? Wrong. Behave as if you are in the real contest. Are you almost sure it will be AC? If yes, submit
	TRAIN offline as if you are in a real contest. This shortens the gap between training and the real contest
Code Failed :(
	Are you nervous / frustrated? Yes => Wrong behavior. Take it easy
	Rush to test cases? Yes => Wrong, revise idea, then code, then trace more samples. Try for 15 minutes or more first
Got it AC	
JOI II AO	Read and Understood editorial solutions?
	Checked 1-3 other AC solutions?
	Tried to write a much shorter version of your code?
	Tried to write a faster coder (better complexity)?
Speed	
	How much time do you need in Div2-A/Div2-B? Target (5, 10) minutes for semiseniors, (3, 6) for seniors
	Not that fast? You need regular speed training on easy problems
Veakly contests	
veakly contests	Do you participate in 1-2 contests per week at least? If no, this is bad. Offline training != Online contests
	You need to train yourself to behave in online contests similar to offline training. This is an important skill.
Sheet stats	
	Recorded them? Yes: read your problem's row. Where do you consume the most of the time? These are your weak skills
	No, I don't record! => How will you know your weak points?!
	Can't record timing as I am mixing thinking with coding? => Wrong behavior. get done with thinking, then move to coding. Don't cycle
raining Time	
raining Time	Is it regular and scheduled? Yes => you will have regular improvements.
	Your plan was to train X hours, Did so? If no, why?
	Without regular and continous training, your mind might not improve well
Fraining with?	

Psychological issues	
	Do you keep comparing yourself with others?
	Do you have negative feelings? Like I am stupidI am hopelessI will never have a comparable level?
	Do you think of your image/appearance if failed in online contests so avoid contests?
	Do you use another account with a weird name to train so that people don't know about your progress/failure?
	Do you wish your friends fail in the contest? or get annoyed with their better performance?
	Do you avoid teaching your friends something or give no support to remain better than them?
	Do you feel bored/frustrated as no/weak community in your college?
	Do you keep training day and night without breaks? No socialization at all?
	Do you hate specific topics and avoid them (probability/geometry)?
	'Should I stop' Dilemma? Keep thinking is it worth vs a waste of time?
	If any of the above questions is YES, you probably have a problem and need to find a solution to it.
